

Startupbootcamp

Energy Australia

Are you a startup founder looking to scale globally? Could your idea or technology be used to solve global energy problems? Would you like to meet and get feedback from industry experts, potential partners, and investors?

We're looking for you!

Startupbootcamp Energy Australia is the leading global accelerator for innovative startups solving problems in Energy Efficiency, Energy Independence, Digitisation and Analytics.

We're looking for startups across industries with innovative products, services or disruptive business models that might have solutions for the energy sector in the following areas: Smart Grid, Sustainable Cities & Living, Smart Buildings & Infrastructure, Energy Sharing & Trading, Big Data & Advanced Analytics, IoT & Connectivity, AI & ML, and Blockchain.

You'll receive mentorship from 100+ experts, free office space, seed funding, and access to our global network of investors. You'll work with some of Australia's leading corporates and their innovation teams, their resources and customers to rapidly scale your business. More info is on [our website](#).

What Is A Startupbootcamp FastTrack?

FastTracks are our way to meet the best global startups and give back. From Aug-Oct 2017, we'll visit 28 cities around the world.

You tell us what you do, and together with extremely high calibre local experts, our team will make global connections, give advice and try to help solve some of your biggest challenges. In half a day, we get you in front of people who can help accelerate your business giving you a taste of how we work.

We encourage all startups to apply and attend. The events are free of charge with no commitments. Our goal is to meet you and support the best talent in each city.
